

# BLOCKS MANAGER FOR EDUCATION™

Internet content filtering for Google App Managed Chromebooks  
in a 21st Century learning environment

## Parent dashboard

As students across the country go 1:1 and bring school managed Chromebooks home, parents and guardians struggle on how to deal with that new device in town.

Blocks Manager Parent Dashboard puts parents and guardians and Directors of Technology on the same page by giving parents the flexibility to enforce their own home policies such as bedtime and control over specific content irrelevant to homework.

The Parent Dashboard assures the 1:1 Chromebook initiative is accepted by parents, teachers and students.

Enforce bedtime and time access control on streaming media, social media, Youtube, gaming and other time addictive content.

Make exception to the school enforced policy when the Chromebook is at home, by allowing or blocking specific online content.

View web history and analyze trend of your child internet browsing activity and get warned when blocked content is accessed.

- Scalable to thousands of Chromebooks
- Fully GAFE (Google Apps For Education) compliant
- Web management Dashboard
- Chrome Extension based
- Intelligent scanning of the internet to classify new unrated content
- Rich analytics per user
- Youtube content and channel filtering
- Teacher, Parent and Admin dashboard
- Custom categories build up
- Cloud based Filtering
- 79 web filtering categories, 45 million rated websites and over 2 billion rated web pages

Blocksi Manager Parent Dashboard allows parents to be in control at home by allowing access to specific features.

They are able to control time access and enforce time restrictions on addictive content. The black and white list to customize which sites are allowed and blocked and web history and analytics to analyze browsing trends
