BMEE (Blocks! Manager Education Everywhere) allows school teachers and administrators to leverage internet content seamlessly so to make of Chromebooks, devices aimed at supporting 21st century digital learning while at the same time preventing students from distractions inherent to the nature of the internet.

BMEE is a multi-layer cloud filtering system for GSuite Managed Chromebooks. It allows IT administrator to push to every Chromebook, geo-localized filtering policies. Internet filtering is enforced to every Chromebook according to policies made of web, Youtube, content, time access management and application filter profiles.

21st century digital learning brings a new paradigm where 1:1 Chromebook classroom transforms the way teachers used to teach. BMEE is aswell a classroom management system that allows teachers to monitor every Chromebook screen in their class while at the same time collect Learning analytics and enforce content.

BMEE also offers Trends- an AI-powered tool that allows school administrators, principals, and delegates to detect harmful behaviour on any student's Gsuite Gmail, Google Docs, Google Drive and Youtube account.

BMEE Anti-theft is a feature that lets you track the exact location and activity of a lost or stolen Chromebook.

SCHOOL ADMIN DASHBOARD

Education everywhere gives school administrators the ability to granularly apply a **Filtering policy to Chromebook enrolled into a GAFE domain.**

BMEE is a non proxy, cloud based internet and Youtube filtering and trend analysis solution. It is very granular and as such the administrator(s) can manage multiple filtering policies and apply them to different Organization Units.

TEACHER DASHBOARD

21st century digital learning brings a new paradigm where 1:1 Chromebook classroom transforms the way teachers used to teach. They can **push a filtering policy to every Chromebook of their class while at the same time have the ability to monitor each and every Chromebook's screen.**

This Dashboard allows an import of existing Google Classroom classes or lets the teacher create their own with Google App user directory.

PARENT DASHBOARD

Chromebook rollout initiatives are more successful when parents are empowered.

This Dashboard gives parents **access time control for their child's GAFE enrolled Chromebook, when it is geolocalized outside of the school campus.** The parent can time control the Chromebook for Youtube, Social media or online gaming and can also get time span analytics on the URL visits, whether these have been blocked or allowed.

DELEGATE DASHBOARD

Principals, super intendants and any non-technical personnel with a certain district responsibility need access to data analytics to drive success throughout the student community.

The Delegate Dashboard brings to school executives what matters most to them; granular per student insights without the Administrator Dashboard complexities.
