

# Parent dashboard

A **Blocksi Manager: Education everywhere** component for Chromebook internet content filtering in a 21st century learning environment.

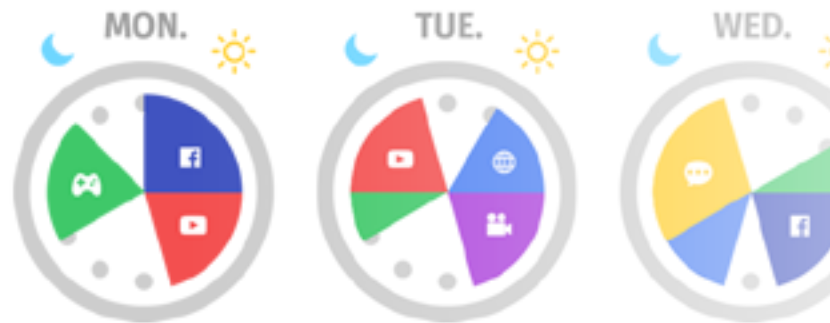

As students across the country go 1:1 and bring school managed Chromebooks home, parents and guardians struggle on how to deal with that new device in town.

Blocksi Manager Parent Dashboard puts parents and guardians and Directors of Technology on the same page by giving parents the flexibility to enforce their own home policies such as bedtime and control over specific content irrelevant to homework.

The Parent Dashboard assures that 1:1 Chromebook initiative is accepted by parents, teachers and students.

Enforce bedtime and time access control on streaming media, social media, Youtube, gaming and other time addictive content.

Make exception to the school enforced policy when the Chromebook is at home, by allowing or blocking specific online content.

View web history and analyze trend of your child internet browsing activity and get warned when blocked content is accessed.

Scalable to thousands of Chromebooks

Youtube content and channel filtering

Smart scanning of the internet to classify new unrated content

Rich Analytics per user

Teacher, Parent, Admin & Delegate dashboard

Custom categories build up

Cloud based Filtering

Chrome extension based

Fully GSuite compliant

79 web filtering categories, 45 million rated websites and over 2 billion rated web pages

Use Blocksli on the go with the Parent dashboard app!
