

Breaking Data Silos with Deep Insight Analytics

Optimize device allocation, app usage, and EdTech investments with our **Deep Insight Analytics**. Access real-time insights, a comprehensive data overview, and **up to 5 years of exportable CSV reports**—all in one powerful platform.

- Optimize EdTech investments with data-driven **App Usage Insights**.

Monitor **Key Performance Indicators (KPIs)** and gather and analyze data from a school's **Student Information System (SIS)**

Business Intelligence For Resource Optimization

Cost Reduction: Track Activities Across The Entire District To Ensure Maximum Return On Investment

With Blocks's Deep Insight Analytics, you can identify underused or redundant applications, allowing you to reallocate funds to more effective tools—helping you maximize the value of every dollar spent on EdTech.

Advanced Analytics to Identify Risks, Fine-Tune Filtering, and Help Cut School Costs

OU or User-based reporting

Audit Trail, DNS Logs, Teacher Class Overview, Web Browsing Activity, Student Safety Alerts, and more

Blocks has been a great addition to our filtering solutions. Web Analytics and detailed reports capabilities make it easy to identify problems and/or adjust for issues you would not know about otherwise.
