Automatic Lesson Notes for Teachers

Blocksi's **Class Notes** captures spoken instruction during live classes and turns it into clean summaries — helping teachers save time, support students, and improve communication.

Fully integrated into the Teacher Dashboard and part of the expanding AI Hub, in partnership with Lightspeed Technologies for the best audio capture.

Key Capabilities

Automatic Lesson Notes: Start automatically when class begins, or toggle on/off as needed.

Teacher-Controlled Recording: Teachers choose when to record, stop, or automate transcription.

Prompt PDF Reports: Each recorded session produces a downloadable PDF and is emailed to the teacher.

Searchable, Organized Lesson Notes: Summarizations are stored by class and date for quick access and sharing.

Quick One-Time Setup: Admins activate the tool; teachers complete a short voice calibration once.

Lesson Transcription, Built Into Blocks! Classroom Management Platform

Teacher Autonomy: Flexible controls without interrupting instruction.

Classroom Continuity: Reliable lesson records for substitutes, absences, and reviews.

Admin Oversight: Gives administrators access to clear lesson records when additional context is needed.

Student Support: Provides teachers with material they can use to reinforce learning or share follow-up information when needed.

Built for Modern Schools: No extra platforms, no added workload — fully integrated into Blocks!.

When teachers talk, Blocks! writes. Every session becomes a clean record that teachers can reference anytime.

- For teachers who want accurate, ready-to-use lesson records
- For students who need clear written support
- For schools that require consistent documentation
- For districts standardizing classroom workflows
- For greater teacher autonomy and classroom continuity
