

Classroom Management System

One Dashboard for Screen Monitoring, Classroom Management & Instruction

Blocksi's Teacher Dashboard brings together real-time screen monitoring, content control, and instruction delivery tools in one place. Teachers get a live view of every student device, instant block and allow controls, assessment lock-down mode, analytics, and more — **built to save teachers time, not add to it.**

Assessment Mode: Secure Test-Taking

Place students into fully locked-down sessions with a single click. Choose from 25+ presets or build a custom one — enforced URLs, automatic tab management, and flexible controls for individual students, groups, or the whole class.

Block and Allow on the Fly

Block or allow any URL or domain instantly, right from the dashboard. Overrides apply at the student or class level, and can be saved and reused whenever needed.

Rostering and Integrations

Automatic class rostering via Google Classroom, Clever, ClassLink, Canvas, Wonde, and OneRoster. Student rosters sync seamlessly — no manual imports, no duplicate data entry.

AI Hub: Plagiarism Checker, Quiz Generator & More

Generate custom quizzes, check for plagiarism or AI-generated content, and access the most popular teacher AI apps — all from one place.

Plagiarism Checker

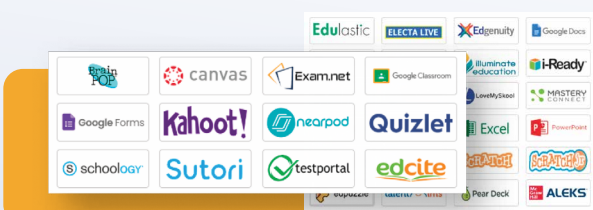

Video Conferencing & Student Groups

Run whole-class video sessions or hold private conferences with individual students. Organize students into Student Groups to push targeted activities, assessments, policies, or Breakout Room sessions.

Designed for Teachers

One clean interface — everything you need to run your classroom, right where you expect it. Set up in minutes, easy to use from day one, and designed to get out of your way.

And if you ever need it, built-in chat support and a searchable help section are right there.

Instruction Delivery Tool for Modern Teachers

One Dashboard. Full Control.

Live Screen View & Student Controls

See every student's screen in real time, zoom in on any device, and act instantly — close tabs, navigate to any open page, or assign a policy to an individual student on the fly.

Screen Sharing

Share the teacher's screen with the whole class instantly, or let students share their screens with peers. No third-party tools needed.

Heads Up, Raise Hand & Student Chat

Send a timed Heads Up alert to temporarily lock individual or all student screens.

Students can raise their hand digitally or send you a direct message — without disrupting the class.

Class Scheduler

Schedule your classes once, and they run on their own — starting and ending automatically, with pre-set controls activating in the background at the right time.

Session Replay

Review a sequential visual record of any student's session after class. Useful for identifying patterns, following up on concerns, and understanding how class time was spent.

Substitute & Co-Teacher Support

Grant temporary access to substitute teachers with a set end date — up to 3 substitutes with individual logins. Or add co-teachers for joint work on shared classes.

Dynamic Seating Charts & Attendance

Drag and drop student tiles into a layout that mirrors your actual classroom. Mark attendance directly from the same view and retrieve records later.

Insight Analytics & Activity Reports

Get a full picture of classroom activity — web usage, YouTube, search queries, apps, and per-student timelines, exportable in PDF or CSV.

Student Aliases

Assign aliases to replace student names on screen — practical for long names that don't fit, useful when student privacy matters, or both.

Add-Ons

Digital Hall Pass — create passes, approve or deny requests on the fly, track active passes with live countdowns, and pause incoming requests whenever needed. All from the Blocksi Teacher Dashboard.

Class Notes — turn on transcription, teach your class, and receive a clean AI-generated summary PDF delivered to your email when the session ends. Accessible and downloadable from the class tile at any time.
